

Darren Hong

Rosemead, CA — darrenh6293@gmail.com — (626) 495-6875

Education

California Polytechnic State University, San Luis Obispo

Bachelor of Science in Computer Science

June 2025

GPA: 3.61 / 4

Dean's List (Multiple Quarters)

Professional Experience

Technology Professional Intern I

March 2026 – Present

Los Angeles County Internal Services Department (ISD)

- Developed and maintained frontend components for web applications using React, TypeScript, JavaScript, HTML, and CSS, creating user interfaces and improving application usability.
- Assisted in the development of a technology learning platform by designing web pages, implementing features, creating SQL Server database schemas, and developing REST APIs using ASP.NET Core to support user data, learning content, and application functionality.
- Built workflow automation solutions using Microsoft Power Automate and Power Apps by integrating SharePoint Lists, Microsoft Forms, Excel spreadsheets, Microsoft Teams, and Outlook to automate notifications, data processing, and business processes.
- Assisted with application testing, accessibility improvements, and system integration efforts to enhance reliability, performance, and user experience of an internal County application.

Personal Projects

Event Tracker Website

May 2025 - Present

- Building a full-stack web application for event tracking using Next.js, Tailwind CSS, and TypeScript, with early users actively testing and providing feedback.
- Integrated Google OAuth for secure user authentication and registration workflows.
- Deployed a serverless backend architecture using AWS and Prisma ORM.
- Designed and implemented REST APIs to support dynamic thread and post creation, enabling user interaction around events.

Service Marketplace App Prototype

December 2022 - April 2023

- Worked in a group to create a developer environment for a Next.js web application connecting homeowners with home-service professionals.
- Containerized the application using Docker for local development and deployment.
- Integrated Prisma ORM with a PostgreSQL database for efficient data management.
- Hosted and tested in a Docker environment to simulate real deployment scenarios.

Ad Timing Web Extension Research

December 2024 - June 2025

- Built a browser extension for YouTube that allowed users to manually trigger mid-roll ads within a specific window, mimicking YouTube's native interface.
- Implemented UI components to enable intuitive user control of ad timing.
- Conducted a user study to evaluate the impact on user experience and control.
- Analyzed qualitative and quantitative data, producing evidence that user-controlled ad timing can improve satisfaction and reduce perceived ad intrusiveness.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS, C, C#

Databases: PostgreSQL, MySQL, DuckDB

Other Tools: AWS, Cloudflare, Git, Docker, React, Next.js, Prisma, Jest, Terraform, Vercel
